

SYLLABUS

1. Information regarding the programme

1.1 Higher education institution	Babeş-Bolyai University
1.2 Faculty	Faculty of Mathematics and Computer Science
1.3 Department	Department of Mathematics
1.4 Field of study	Mathematics
1.5 Study cycle	Master
1.6 Study programme / Qualification	Advanced Mathematics

2. Information regarding the discipline

2.1 Name of the discipline	Category theory						
2.2 Course coordinator	Prof.PhD. Septimiu Crivei						
2.3 Seminar coordinator	Prof.PhD. Septimiu Crivei						
2.4. Year of study	1	2.5 Semester	1	2.6. Type of evaluation	E	2.7 Type of discipline	DF

3. Total estimated time (hours/semester of didactic activities)

3.1 Hours per week	3	Of which: 3.2 course	2	3.3 seminar/laboratory	1	
3.4 Total hours in the curriculum	42	Of which: 3.5 course	28	3.6 seminar/laboratory	14	
Time allotment:						hours
Learning using manual, course support, bibliography, course notes						28
Additional documentation (in libraries, on electronic platforms, field documentation)						28
Preparation for seminars/labs, homework, papers, portfolios and essays						42
Tutorship						28
Evaluations						32
Other activities:						
3.7 Total individual study hours	158					
3.8 Total hours per semester	200					
3.9 Number of ECTS credits	8					

4. Prerequisites (if necessary)

4.1. curriculum	<input type="checkbox"/> Algebraic structures
4.2. competencies	<input type="checkbox"/>

5. Conditions (if necessary)

5.1. for the course	<input type="checkbox"/>
5.2. for the seminar /lab	<input type="checkbox"/>

activities	
------------	--

6. Specific competencies acquired

Professional competencies	<input type="checkbox"/> Ability to operate with abstract concepts. <input type="checkbox"/> Ability to apply the acquired knowledge to subdomains of mathematics.
Transversal competencies	<input type="checkbox"/> Development of abstract thinking. <input type="checkbox"/> Ability to perform research.

7. Objectives of the discipline (outcome of the acquired competencies)

7.1 General objective of the discipline	<input type="checkbox"/> To acquire the basic knowledge on category theory.
7.2 Specific objective of the discipline	<input type="checkbox"/> To acquire specific working techniques.

8. Content

8.1 Course	Teaching methods	Remarks
1. Categories - definition and examples	Exposition, proof, examples	
2. Special objects and morphisms	Exposition, proof, examples	
3. Constructions on categories	Exposition, proof, examples	
4. Products and coproducts	Exposition, proof, examples	
5. Equalizers and coequalizers	Exposition, proof, examples	
6. Pullbacks and pushouts	Exposition, proof, examples	
7. Limits and colimits	Exposition, proof, examples	
8. Natural transformations	Exposition, proof, examples	
9. Equivalence of categories	Exposition, proof, examples	
10. Yoneda Lemma	Exposition, proof, examples	
11. Adjoint functors	Exposition, proof, examples	
12. Grothendieck categories	Exposition, proof, examples	
13. Abelian categories	Exposition, proof, examples	
14. Exact categories	Exposition, proof, examples	
Bibliography <ol style="list-style-type: none"> 1. S. Awodey, <i>Category theory</i>, Oxford University Press, 2010. 2. S. Mac Lane, <i>Categories for the working mathematician</i>, Springer, 1998. 3. B. Mitchell, <i>Theory of categories</i>, Academic Press, New York, London, 1965. 4. C. Nastasescu, <i>Inele, module, categorii</i> (in Romanian), Editura Academiei, Bucuresti, 1976. 5. I. Purdea, <i>Tratat de algebra moderna</i>, vol. II (in Romanian), Editura Academiei, Bucuresti, 1982. 		
8.2 Seminar / laboratory	Teaching methods	Remarks

1. Categories - definition and examples	Explanation, problematization, examples	
2. Special objects and morphisms	Explanation, problematization, examples	
3. Constructions on categories	Explanation, problematization, examples	
4. Products and coproducts	Explanation, problematization, examples	
5. Equalizers and coequalizers	Explanation, problematization, examples	
6. Pullbacks and pushouts	Explanation, problematization, examples	
7. Limits and colimits	Explanation, problematization, examples	
8. Natural transformations	Explanation, problematization, examples	
9. Equivalence of categories	Explanation, problematization, examples	
10. Yoneda Lemma	Explanation, problematization, examples	
11. Adjoint functors	Explanation, problematization, examples	
12. Grothendieck categories	Explanation, problematization, examples	
13. Abelian categories	Explanation, problematization, examples	
14. Exact categories	Explanation, problematization, examples	

Bibliography

1. S. Awodey, *Category theory*, Oxford University Press, 2010.
2. S. Mac Lane, *Categories for the working mathematician*, Springer, 1998.
3. B. Mitchell, *Theory of categories*, Academic Press, New York, London, 1965.
4. C. Nastasescu, *Inele, module, categorii* (in Romanian), Editura Academiei, Bucuresti, 1976.
5. I. Purdea, *Tratat de algebra moderna*, vol. II (in Romanian), Editura Academiei, Bucuresti, 1982.

9. Corroborating the content of the discipline with the expectations of the epistemic community, professional associations and representative employers within the field of the program

- The contents is directed towards theory and applications of categories. The topic is present in many master programs from other universities.

10. Evaluation

Type of activity	10.1 Evaluation criteria	10.2 Evaluation methods	10.3 Share in the grade (%)
10.4 Course	Use of basic concepts, examples	Project, presentation.	50
10.5 Seminar/lab activities	Problem solving	Assignments, presentation.	50
10.6 Minimum performance standards			
<input type="checkbox"/> Grade 5			

Date

26.04.2024

Signature of course coordinator

Prof. PhD. Septimiu CRIVEI

Signature of seminar coordinator

Prof. PhD. Septimiu CRIVEI

Date of approval

Signature of the head of department

Prof. PhD. Andrei MARCUS
