# Proceedings of the
# Computer Science Students Conference

**Edition III**

**4th Computer Science Students Conference**
**Cluj-Napoca, June 2013**

Organized by

**Computer Science Department**
**Faculty of Automation and Computer Science**
**Technical University Cluj-Napoca**

**Computer Science Department**
**Faculty of Mathematics and Computer Science**
**Babes-Bolyai University Cluj-Napoca**

**ISSN 2285 – 2166**

**2013**

# Table of contents:

### Computer Science Department, UTCN and Computer Science Department UBB

Adrian Coapsi, Radu Razvan Slavescu (UTCN), *TouristicScheduler: A Personalized Scheduler System for Tourists*.....1-6

Miklos Albert (UBB), *3D Object Manipulation in Virtual Reality Environments*.....7-12

Ioana Maria Sima, Mariana Vunvulea (UTCN), *A Rule-based, Domain Independent Approach for Opinion and Holder Identification*.....13-20

Alin Grosan, Doru-Bogdan Terec, Radu Razvan Slavescu (UTCN), *Rule Based Expert System for Assisting Medics in Protocols Based Activities*.....21-26

Alexandru Silvesan, Diana Chinces, Ioan Salomie (UTCN), *Optimization of business processes using genetic algorithms*.....27-33

Medina Andresel (UBB), *Object Recognition using Kernel Descriptors and Support Vector Machines (SVM)*.....34-37

Dan Alexandru Marchis, R. Slavescu (UTCN), *Rule-Based Expert System for Medical Diagnosis using Subjective Logic*.....38-43

Silvana Albu (UBB), *WYSST (What You Should See Today)*.....44-49

Paul Parau, Alexandru Stef (UTCN), *A Community Detection Based Approach to Sentiment Analysis*.....50-57

Adrian Popescu, Anca Marginean (UTCN), *Agent-based traffic routing*.....58-64

Roxana Dorina Moldovan, Eneia Nicolae Todoran (UTCN), *Simulating the immune system using Bio-PEPA*.....65-72

Tamas Bela (UBB), *Carpooling System*.....73-80

Alina Beldean (UBB), *Data Visualization using concepts from social networks*.....81-86

Bogdan Bondor (UBB), A *Comparison of Developing Web Applications with Different Server-Side Technologies* .....87-94

Raluca-Sonia Chiorean, Daciana Ioana Faloba (UTCN), *Sentiment Analysis in Opinion Extraction and Text Polarity Identification*.....95-102

Catalin Cocis, Alin Suciu (UTCN), *A comparison between different approaches for sampling Discrete Gaussians*.....103-109

Andrada Demian, Eneia Todoran (UTCN), *Performance Analysis of Distributed Systems Built Using Session Types Programming*.....110-105

Bogdan Brisc (UBB), *RealScrape – A framework for scraping dynamic web pages*.....106-112

Natali Glodeanu (UBB), *Kflow – Kinect tool for interactive presentations*.....113-120

Mihai Ispas, Nicusor-Cosmin Lare, Sergiu Adrian Darabant (UBB), Diana-Laura Borza (UTCN), *OptiMeasure: A Mobile Improvement Alternative to Classic Optical Measurements*.....121-128

Bogdan Vancea, Alexandru Marchis (UTCN), *A Big Data Approach for Contradiction Detection*.....129-136

Alexandra Zaharia, Alin Suciu (UTCN), *Enhancing the Unpredictable Random Number Generator Based on Hardware Counters*.....137-143

Andrei Haidau, Alin Suciu (UTCN), *One Time Pad applied in video encryption*.....144-148

Iulia Pascu, Christian Sacarea, Adrian Sergiu Darabant (UBB), *Ennoia and Noos: Large Datasets Processing Tool*.....149-156

Alina Perde (UBB), *Hardware devices management (HDM)*.....157-162

Cristina Precup, Carmen-Teodora Popescu (UBB), *BarRD – the Barman Robot Device*.....163-168

Cristina Berci, Oana Madalina Buncila (UTCN), *Word Sense Disambiguation and Automatic Synonym Expansion*.....169-176

Raul Pop, Raluca Brehar (UTCN), *An improvement of Pedestrian detection algorithms using Graphical Processing Units*.....177-182

Dragos Petcu, Bogdan Iancu (UTCN), *Integrating Cisco Packet Tracer with Moodle platform: support for teaching and automatic evaluation*.....183-186

Victor Savu (UBB), *Centrally managed virtual hard drives*.....187-194

Ildiko Szabo, Iacob-Mihail Rînziş (UBB), *Life sized virtual reality simulations applied in therapies using JMonkey Engine*.....195-202

Silviu Ureche (UBB), *Handling Large Amounts of Markers in Maps*.....203-209

Timotei Dolean, Dorian Gorgan (UTCN), *Unitary implementation of interaction techniques in computer games*.....210-213

Titus-Nicolae Giuroiu, Adrian Coleşa (UTCN), *Win API spying on x64*.....214-220

Magda Vasile (UBB), *Textual entailment and similarity recognition*.....221-227

Maria Zaharie (UBB), *A note on Sequence Alignment*.....228-232

**Automation Department, UTCN**

Alexander Bulezyuk, Anita Erőss, Zsombor Sárpataki*, Implementation of Automatic Flight Controls with Wireless Data Logging*.....233-238

Ionut Marian Dobra, *Wi-Fi based Objects Localization in Multipath Environment*……..239-242

Anamaria Fechete, *Numerical solution of differential equations in DeltaV*……..243-249

Bálint Furdek, *Hardware in the Loop (HIL) using Fractional Order Controller*…….250-255

Füstös Csaba, *Fractional Order Controller Design Methods*……..256-261

Tudor Ghiorghiu, Implementing a Synchronization Method Between PC and Mobile Device……..262-266

Nicolae Igna, Ioan Valentin Sita, *Level Control Using SCADA Application*.....267-272

Attila-Zsolt Jaszoly, *Steam Turbine Model in DeltaV*……...273-276

Daniel Valerian Jecan, *Construction and Control of a Mobile Robot - Featuring an autonomous operation mode and a robotic arm with a gripper*……277-282

Bogdan Emil Mariesan, *Processing Database Schemas for Ulterior Optimization*……..283-288

Alina Daniela Moldovan, Dan Radu, *Android Taxi Booking Application*.....289-293

Paul Petrehus, *Fuzzy modeling and design for a 3D Crane*……...294-300

Alexandru Podina, *Indoor Localization using Embedded Wi-Fi Sensors*…….....301-306

Orsolya-Ildiko Pusok, Honoriu Valean, Laszlo Barabas, Lehel Biro, Zsofia Nagy, Arnold Lorincz, *Intelligent Personal Activities Management*……...307-311

Diana Monica Sas, Tiberiu Colosi, *FOPID Controller for DC Motor*……...312-318

Vlad Vezentan, *Model-based Control of an IC engine - Throttle Actuator Modeling, Identification and Control*…….319-324

Ioana Vidrăsan, Tiberiu Leția, *Automatic Scade Project Synthesis using Genetic Programing*…….325-329
