Software Engineering Internship

At Fundmore we are sure there is a better way for people to buy their dream home. We believe that the process of borrowing and lending money is quite outdated and is a source of frustration for all the parties involved. This is why we want to change it for good.

Through technology, deep learning, automation and data science, we can build a bias-free, faster and cheaper loan adjudication platform that also removes the hustles.

As a software developer, you'll be the brain behind crafting, developing, testing, going live and maintaining the system. You are passionate in understanding the business context for features built to drive better customer experience and adoption.

For registration, please send us a **3 minute video** describing:

- a personal project you are proud of; show us code, we love to read it
- what you are interested in learning from our internship program
- a few things about yourself

Tech stack: NodeJS, NestJS, Typescript, PostgreSQL, Angular, HTML/CSS/JS, Serverless (AWS Lambdas), AWS (SQS, SNS, RDS, S3), GitHub

Registration Deadline : May 31st, 2024

Email: careers-dev@fundmore.ai
