

# Internship @ HP

## Server Automation

Join the Server Automation development team for the summer to learn and apply the technologies required for software development on a product that automates the complete operational lifecycle of servers and software. Take the opportunity to work with Program/Product Management, cross-functional R&D teams and QA, to develop, unit test and document software for HP Server Automation.

### What we offer:

- You can start building your career in software development processes under the coordination of our senior colleagues at HP Software
- You have the great opportunity to work with the newest technologies in the field of server automation and administration
- Paid internship, from July 2<sup>nd</sup> until September 14<sup>th</sup>.

### What we need:

- Interested in networking and in using /adminstrating multiple operating systems (Windows, Linux, Solaris)
- Experience with programming languages like Java, C++, Python
- Highly reliable self-starter with a can-do attitude, able to work with minimal supervision.

To apply send your CV to [internshipcluj@hp.com](mailto:internshipcluj@hp.com) until April 22<sup>nd</sup> 2012. Please use "HP Internship 2012" as email subject.
