Mobile Apps Summer Internship

27.06 - 02.09 (10 weeks)

Learn to build mobile apps that stand out, are relevant, and are state of the art.

If you have a passion for software engineering and a motivation to learn and have basic knowledge of Java, C#, C++, or other OOP programming languages (advantage if you know Swift/Kotlin), this internship, spread over **6 weeks**, is for you!

Serious play! What the program covers:

- You will have the opportunity to experience a complete development process of a mobile app (Android, iOS, Flutter), from inception to release. This will include:
- An intro into the technologies used (Swift, Kotlin, and Dart)
- How to use state-of-the-art development tools
- Designing and architecting a mobile app
- Breaking down the workload and estimating it
- Implementing the functionalities, using best practices and the latest technologies for every platform
- How to use a continuous integration tool like Jenkins
- How to work in a team (including reviewing each other's code and interacting with other team members working on different components)
- Demoiing your work to clients

UX / UI Summer Internship

06.06 – 12.08 (10 weeks)

Learn to design mobile apps that stand out, are relevant, and are state of the art.

Do you like technology but are the creative type? Or are you interested in design? Specifically, the UI/UX part of a software app? Then, do read on! We have an upcoming internship and you're welcome to sign up!

Ready, steady, go! What the program covers:

- You will have the opportunity to experience a complete design process of a mobile app (Android, iOS, Flutter), from inception to release. This will include:
 - Requirements analysis
 - Research activities
 - Solution ideation
 - User interface activities (taking into account the platform-specific guidelines)
 - How to work in a team (including, reviewing each other's deliverables and interacting with other team members working on different components)
 - Demoiing your work to clients
