

internship at evoline

evoline is one of Transylvania's most significant software companies. Presently we have offices in two locations, Cluj-Napoca and Tîrgu-Mureş. Along with our international partners, we are specialized in industrial software development of the highest quality. Over 300 employees develop in the field of software systems in different domains, from the planning through testing.

Internship

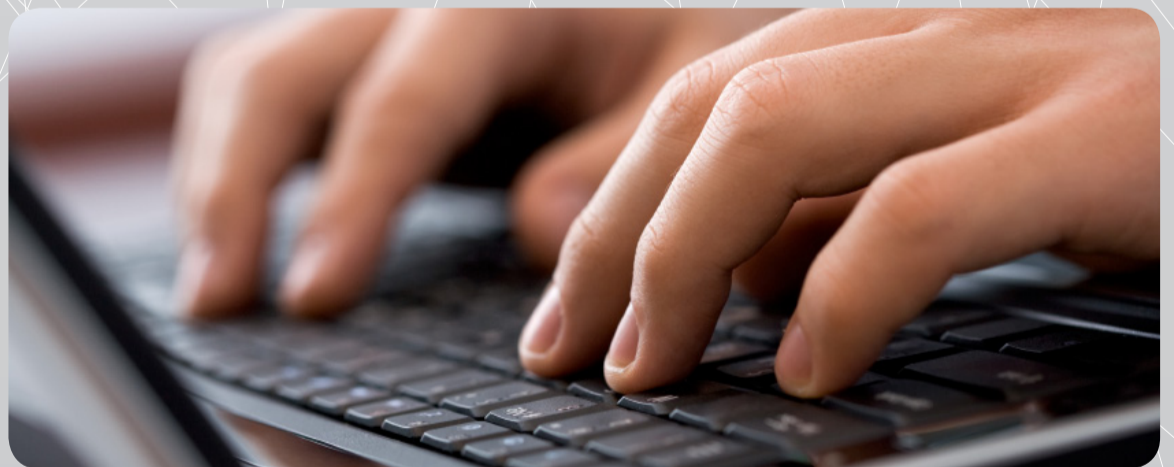

evoline offers internship to minimum 10 students. These interns will collaborate in the realization and extension of different projects of the company throughout the analysis, development, testing and the documentation of the components. During the internship students will get acquainted with evoline's organizational structure and culture, they will get an insight into the development processes used at evoline and will gain very useful professional experience in the IT domain.
